**Project Manager / .NET Developer**

**General**
We are a startup company developing an online solution that consists of four websites. We currently use agile development methods and are in the final months of the development process using the .NET framework. Beta testing is due to commence in March 2014.

**Hours**
Part time (10-20 hours per week)
The initial two months will be more intensive with hours to be renegotiated following that.

**Remuneration**
To be negotiated.

**Reports to**
Project Director

**Duties**
The successful candidate will be required to:
- Provide team leadership on the project
- Identify and specify tasks for each sprint
- Oversee the development team in the Philippines
- Evaluate code compiled by development team in the Philippines
- Track defects, issues and scope changes
- Review and update existing specification in line with latest requirements
- Update project director on a regular basis

**Requirements**
We are looking for someone who has:
- Minimum of 5 years experience designing and building applications using the Microsoft development platform
- Minimum of 3 years project management experience
- Experience in an applications website development environment
- Experience with C#, VB.Net and ASP.NET
- Demonstrated applied understanding of HTML/XHTML/CSS and JavaScript
- Demonstrated experience in the design and development of SQL
- Great attention to detail
- Great communication skills
- Excellent analysis skills
- The ability to review and improve code
- The ability to work autonomously
- A strong sense of commitment
- The ability to work within strict timelines
- Good understanding of and ability to adhere to existing coding standards when developing .NET solutions
- Good problem solving abilities
- An appreciation for UX/UI design
- Experience with quality assurance

**Other**
While the majority of the work can be completed remotely the selected candidate will be required to meet weekly, in person, at our Fortitude Valley office.
