If you’re interested in a job at Anonyome Labs or have an idea for how you can help us stop the rampant use and abuse of our personal information, please send a resume to:

careers@anonyome.com
Anonyome Labs was founded by enterprise security experts, human factor designers, cryptographers, and behavioral psychologists who care about identity and privacy. We believe that personal information harvested, compiled, or stolen during online activity is not for sale and should not be traded for profit without an individual’s expressed consent. We’ve created our technology platform and applications to stop the rampant use and abuse of personal information for unauthorized gain and monetization by search engines, social networking apps, shopping sites, and virtually any website, service, individual or organization.

We created Anonyome Labs to give power back to the people!

Stuff That Matters to Us

- We believe that everyone should have complete control over their personal information.
- We will never support illicit or illegal behavior.
- Elegant design, usable and engaging.
- One team, One goal.
- Challenge the idea, not the person.
- Make a dent in the universe.
- What you DO is what matters.

Stuff That Matters to You

- Competitive salary
- Rich benefit package
- Flexible PTO
- Equity
- Cool work environment
- Creative outlet
- Individual impact on company
