PURPOSE AND OBJECTIVES

As the market leader in enterprise application software, SAP is at the center of today’s business and technology revolution. Our innovations enable more than 293,500 customers worldwide to work together more efficiently and use business insight more effectively.

With Run Simple as our operating principle, SAP’s nearly 74,500 employees focus on a singular purpose that inspires us every day: To help the world run better and improve people’s lives.

The SAP Innovation Centre in Brisbane is a young and dedicated group with the mission to co-innovate with strategic customers to pioneer potential breakthrough software solutions across various industries. To achieve this, together with our customers we discover new business opportunities in Big Data analytics and Machine Learning, validate and bring them to life in a proof-of-concept.

We are looking for a student to support this process from design thinking, discovery, validation, and market potential analysis. You will be part of a multi-disciplinary team of business developers, product managers, designers, data scientists and developers.

Additional information is available at: http://icn.sap.com/home.html

EXPECTATION AND TASKS

As part of the Business Development & Design team, you will utilize your knowledge of business and information technology. Time management, communication, and organisational skills are also important.

Your tasks may include:
- Developing business cases and use cases
- Contributing to marketing & communications of co-innovation prototypes
- Writing articles for publication across the global SAP network
