Job position: Front end developer (graduate development role)

Location: Brisbane CBD

Job status: Full time

Background

Evapeak is an exciting technology spin off from an international commodity company. Chartered to deliver transformational innovation to financial and commodity markets, the new entity has deep expertise and IP in the crypto currency space. It is currently building innovative blockchain solutions for a large client on a managed services basis. The opportunity is for a highly skilled and entrepreneurial graduate to join our team. Our initial needs are for front end developer skills but we are looking for someone who can quickly grow into broader technology roles within the organization.

The role

The Front End Developer will work with the business team and core developers to design, deploy and manage solutions for desktop, iOS and other mobile platforms. Developer should have an understanding of Magento ecommerce platform and back-end programming architecture and technologies used to develop and deploy web projects and mobile applications. Developer should have a high-level of knowledge in design toolsets, and the methods of transforming creative elements for use as HTML based content. Developer should be comfortable working with a large number of projects and live solutions simultaneously. An understanding of the principles behind cryptocurrencies and the blockchain will be well regarded. The ideal candidate would also have a passion for financial markets and trading.

Requirements

- Extensive knowledge in PHP, HTML5 and CSS3, including Webkit animation.
- Experience in JQuery Mobile, Sencha Touch, etc...
- Extensive knowledge in JavaScript/JQuery/Ajax
- Thorough knowledge of design tools including, Photoshop, Illustrator
- Ability to take a PSD/mock or concept and turn it into a working experience
- Experience in creating exciting experiences on the iPad, iPhone and other mobile devices that conform to W3C standards
Desirable

- Interest and understanding of financial markets and trading
- MySQL or MSSQL
- Magento development
- Mathematics/ advanced statistics
- Source control systems such as Git/Github, Subversion, TFS
- Continuous delivery such as Team City, Octopus Deploy, MS Build
- Object oriented programming principles (OOP)
- Design patterns
- Virtualisation, AWS or Azure experience
- Understand the Agile/Scrum work style

Skills

- Comfortable working in a fast paced, high energy environment
- Demonstrate ability to handle multiple projects simultaneously, meet deadlines, effectively manage priorities and communicate progress
- Fresh ideas and diversity in style whilst maintaining attention to detail and documentation/process standards
- Ability to work in team environment including international contractors

Relevant Work Experience/Requirements

- Ability to demonstrate a relevant portfolio of assignment or project work

Education Level

- Bachelor’s Degree/equivalent in Computer Science or Graphic Design.
