C# Full Time Graduate Developer

If you’re a recent graduate with a passion for development, and the drive to build a quality product, we want to hear from you.

We are seeking a graduate developer to join our small team to work on the development of an established product. This position is best suited for a candidate with initiative, capable of working autonomously and co-operatively to complete tasks.

The Role

The successful candidate for the role will focus on implementing and enhancing features, addressing reported bugs and offering client support for one of our products. The role is diverse, with exposure to many different aspects of commercial software development.

Duties of the role include:

- Client interaction
- Design
- Requirements analysis
- Product development
- Continuous integration
- Environment maintenance

The role prioritizes outcome, offering flexibility for the candidate so long as goals and tasks are met.

Technology you’ll be working with:

- C#
- Visual Studio
- NUnit unit-testing framework
- Virtual machines

Essential attributes:

- Attention to detail and a high standard of quality
- Initiative to research and implement problem-solving solutions
- Reliability and consistency
- Enjoys variety in duties

To be considered, you must be a graduate with recent tertiary qualifications in Computer Science, Software Engineering or a related field. If you meet the above criteria and wish to apply, or otherwise have any questions, please forward your resume and academic transcript to jobs@extensia.com.au.
